★ "BEST EVER" (M. STEVENS) ★

(Cherry Color) \$10.00 Net

Maerz & Paul 4-K-4 36" Best Ever is a ripe Cherry shade, a smooth self. The petals are slightly ruffled, the flower wholes together making a 6 in. bloom, branching extremely well with the habit of several blooms opening at one time, this with its 6 weeks blooming period makes it a must in your garden if you want tops in garden value in a daylily. (Fall delivery only.)

(Light red, green throat) \$15.00 Net

Maerz & Paul 1-J-12 34" The form of Connecticut Yankee, plus the heavy blooming has brought lots of comments from our visitors. On established clumps it has had 102 blooms per scape. The striking light red draws attention to the flower immediately, and it is red almost to the center of the flower with a small light green throat. The size of the flower is 4½ to 5 in. (Fall delivery only.)

(M. Stevens) 36" Mid-Season to late

FOLLOW ME is a 6½ inch bloom of Swiss Rose in color with a mid-rid extending from the throat which is yellow green and running to a point in both sepal and petals; starting in the throat and extending out into the whole flower, it gives the effect of a large star in the throat. The petals and sepals are slightly ruffled and recurved. We find it puts up strong scapes that stand erect. In Texas it starts blooming in last June through July, in the east and north it would still bloom later. if you wish to check the color by chart. Plate 44, K-2 in Marez & Paul Color Chart. \$15.00

DIABLO (Red Devil) (M. Stevens)

34" (Semi-de.) Midseason. Diablo is a smooth vivid red self, with a small throat shading yellow to green, it shines like a spotlight when the sun shines on the clump. It has nice branching, and very erect scapes. The size of the blooms are 4½ inches and slightly recurved, which enhances the beauty of this flower. We feel that this daylily is an ideal garden subject in every way. Plate 6, L-6 (Maerz & Paul Color Chart.) Net. \$9.50.

(M. Stevens) 38" Mid-season

Southern Sunshine, is a large Tomato Red, that would be considered a self the red runs deep into the heart of the flower leaving a small yellow green throat. Petals are rather wide and ruffled and the sepals are not too wide but the cup of the flower holds together giving you a wide open bloom. The comments on this flower from our customers over the last few seasons decided that this would be our second introduction. Southern Sunshine is a 5½ in. bloom and is a good tomato color, you may check the color Plate 2, G-11 (Next to tangerine) in Marez & Paul color chart. \$5.00

Hemerocallis or Daylilies

THE BEST TIME TO PLANT DAYLILIES IS USUALLY NOW:

Daylilies transplant safely whenever the ground is workable. Spring and summer plantings permit a full season of root development for that much bloom next year. Fall plantings, except late fall in zero climates, remain a half year ahead of plantings made the following spring. Gain time, accordingly, by planting NOW.

CULTURE AND CARE OF DAYLILIES

A good garden soil that is neutral, whatever its texture, will suit the daylily well. But proper use of composted manure or fertilizer makes an amazing difference. When planting a good bit of organic fertilizer worked into the soil often means a year less for it to reach peak blooming performance which generally may be counted on in the third year. Spreading the roots and setting the plant so that the union of foliage and root is one inch under the ground when properly settled is an essential.

FERTILIZATION: Never use a fertilizer that is high **NITROGEN** content. This produces lush foliage and no blooms. A medium of around 4% would be sufficient feeding in the fall and again in the early spring it is always better to feed more often than to apply too heavy a feeding at one time. In area of 50 ft. by 20 ft. you would use 25 lbs. of 4-12-4, 20 lbs. of 5-10-5. Either would give you good results. Always remember that plants respond to feeding and care the same as our children do.

Daylilies need little care outside of careful weeding for the first year and as much as is needed for appearance's sake in following years. The rootlets come close to the surface and cultivation should be shallow. Unless they are planted in the autumn they are best off without any protection other than their own foliage which should be left with them until the spring clean-up.

Daylilies thrive best in sun, but the darker ones are more truly lovely if they are partially shaded during the brightest hours of the day. Proper placement is a personal challenge. With careful choice of colors daylilies are handsome with irises, peonies, delphinium, phlox and chrysanthemums. The dark varieties should never be clumped together but built up as individuals through the use of the yellow and gold varieties.

—GENERAL LIST—

ADAIGO. (Russell) 36". A brilliant red with a deeper eye zone and a small yellow throat. 4" bloom \$ 1.50

- BARONET.** (Stout) 24". Small rounded flower or rosey-red, very beautiful in a climp and almost a constant bloomer for us, remaining open evenings. \$ 1.00
3 for \$ 2.00
- BERNICE RUSSELL.** 30". The color of Bernice Russell is what I'd call a most magnificent shade of rosy cinnamon-yellow bordering on brownish but to me far more appealing than Painted Lady because it does not have the depth of brown. 7-inch bloom. \$ 3.00
- "BEST EVER"** (M. Stevens) 36". (See page 1) \$10.00 net
- BESS VESTAL.** (House) 36". This is a very showy red, having nice width in the petals, we think it is a very fine red. \$ 3.00
- BELLE OF GEORGIA.** (Russell) Fine peach toned blend, good form, mid-season \$ 2.00
- B. H. FARR.** 36". One of your peach tone daylilies listed as pink over buff, sometimes blooming very pink in tone. \$ 1.00
3 for \$ 2.00
- BI-COLOR.** (Stout) 38". This daylily has the finest stalk and branching we have seen and seems to give this to its children, besides the fine branching it has, the texture is good. Petals are a rose red and sepal yellow, a distinct bi-color. \$ 1.00
3 for \$ 2.00
- BLACK HILLS.** (Russell). This daylily is really black. About a 4½" bloom, but the height varies on it from 30 to 36 inches. \$ 1.00
3 for \$ 2.00
- BLACK CHERRY** (Douglas). A rich black-red gracefully and beautifully formed. Unfading \$ 2.00
- BLANCH HOOKER.** (Stout) 36". An intense uniform orange red, this is not too large a bloom, but has a habit of blooming spring and fall. \$1.50
- BLACK BEAUTY.** (Russell) 36". A true rich black red with darker veins and yellow-green throat. 4½-inch bloom. May, June. \$ 2.00
- BLACK FALCON.** (Nesmith) 38". Incredibly dark, this is the nearest to black of any hemerocallis I have seen. The flowers are large, open and wavy

- at the edges with a shallow pale canary yellow cup. A stunning and unusual hemerocallis. \$ 2.00
- BOLD COURTIER.** (Nesmith) 36". Broad pompeian rose petals with soft yellow petals. The bloom is large and wide. \$ 1.50
- BOUTONNIERE.** 32". Late bloomer, very profuse, peach and apricot tone. \$.50
- BRIGHT EYES.** (Russell) 20". This is a miniature Mikado, same coloring and eye-zone excepting the height it is a dwarf. \$ 1.50
- BRUNETTE.** (Stout) 24". A twice blooming semi-dwarf red that is wonderful planted with the Iris and the daylily Minor, it is a must if you want color early and late \$1.00
- BUCKEYE.** (Stout). Clear yellow orange with mahogany red-eye, the flowers are Amaryllis-like with blooms spring and fall. One of Dr. Stout's best in the eye-zone varieties \$ 1.00
3 for \$ 2.00
- CABALLERO.** (Stout) 48". Yellow and more pink than red bicolor, its form reminds one of a huge butterfly, very outstanding in the daylily world. \$ 1.00
3 for \$ 2.00
- CALYPSO.** 36". Light yellow night bloomer. This is very nice to plant where you sit at night in your garden, very pleasing effect \$.50
3 for \$ 1.00
- CAVALIER.** 34". A beautiful rose flecked over grayish-green background. Very unusual combination. \$.50
3 for \$ 1.00
- CALCUTTA.** (Russell) 30". This has full overlapping petals of truly wine-red with a small golden throat. 5½-in. bloom. Mr. Russell lists this as one of his dwarfs but for us on established clumps, it blooms 30 to 36 in. tall. \$ 1.50
3 for \$ 1.00
- CAPRICE.** 2 ft. Many full, cupshaped, rich brownish red, 2½" blooms. Sepals bordered cadmium; throat cadmium. Unique for black stems and buds. Blooms with tulips and irises. Net \$ 2.00
- CAPISTRANO.** (Milliken) 48". This is a large yellow with a slight halo in the throat, the flower is so large it should be planted in a sheltered place as the wind seems to tear it, this is mainly due to the size of the bloom and not the texture. \$ 1.50
- CATHAY.** (Stout) 38". The dominant colors of the flower are a golden-orange in the throat and scarlet-red on the blades, the shade at the throat is almost carmine. (Net). \$ 3.00
- CELLENI.** (Wheeler) 38". A new break in a flower form. The flower is so well formed that the petals and sepals are rounded and overlapping, the texture is wonderful and color of sulphur-yellow, we think it ranks 3rd in the Wheeler daylilies Ruby Supreme, and Naranja being 1st and second. (Net)..... \$ 6.00
- CHISCA.** 36". Rose and yellow bi-color, one of the first bi-colors to bloom. \$.50
3 for \$ 1.00
- CHALLENGER.** (Stout) 48". A beautiful cherry-red with a white mid-rib and a greenish throat, the flowers are very large and the plant as a whole, has branching height and texture we like it best of all of Stout's introductions of 1949. (Net). \$ 3.00
- CHINA ROSE.** 36". This is a real rosy red with light midrib in each petal and a yellow trace around the entire flower. The throat is green and the petals are ruffled. 4½-inch bloom. \$ 2.00
- CHLOE.** (Nesmith) 32". This is indeed a very beautiful daylily. The background deep yellow flecked and powdered with gold or a deeper tone, wide petal and sepal overlapping, really odd in the brushed tone daylilies. \$ 1.50
- CINNABAR.** 32". This is nice cup shaped orange, flecked with red as if dusted with cinnamon. \$.50
3 for \$ 1.00

"Always More Room For Daylilies"

CONNECTICUT YANKEE. (M. Stevens) 34". (See Page 1)\$ 5.00 Net.

COLONIAL DAME. (Milliken). Large apricot banded with a rosy tan, petals are very broad and ruffled, one of Mr. Milliken's best. (Net)\$ 7.50

DAILY DOUBLE. (Douglas) 32". This is an orange tone with some buff tone, it being unique in that most of the blooms are double in the center, it has nice texture and form is quite round.\$ 3.00

DAUNTLESS. 34". Yellowish-buff, wide petal and sepal with faint halo.\$.75
3 for \$ 1.50

DAWN PLAY. (Nesmith) 48'. An open flower of deep rose with a gold-enthrroat, its height makes it a good background daylily.\$ 2.00

DEMI-TASSE. (Wheeler) 18". This is a bi-color, maroon and yellow with a flush of maroon on the sepals.\$ 1.50

DESERT STAR. (Russell) 30". This buff has a shape entirely different from other Daylilies. It resembles a floret of a huge delphinium. The petals are ruffled, as though you had taken a needle and thread and sewed pleats in them! Holds its face slightly upright as does no other Daylily, its green throat enhances the beauty of this buff. Fast multiplier, 4" bloom. April, May.\$ 2.00

DIABLO. (M. Stevens) 34". (Red Devil). See Page 1).\$ 9.50

DIXIE BELLE. (Russell) 48". We love this Chinese-red daylily with its green throat, it has rich, deep eye-zone in the throat and the combination is quite striking. Blooming from late June through July, it is well worth having in the garden\$ 1.00

DOROTHY McDADE. (Sass) 34". This is quite a late blooming yellow giving a good performance on a clump, the color is somewhat lemon-yellow.\$ 1.00

it repeats over a very long period.
.....\$ 1.50

DRESS REHEARSAL. (Russell) 40". Petals and sepals are salmon-pink with old-rose-eye zone; the throat is yellow. These larger, widely open, full blooms will give added beauty to any garden. Keeps well in the evening. May-June.\$ 2.00

DR. SLAUGHTER. (Russell) 34". This is a circus wagon red with an orange stripe down petal and sepal, one spots its plum across the garden. You could say it is quite gaudy.\$ 1.00

DUMORTIERE. 24". Semi-dwarf soft apricot-buff with brown on the back.\$.50
3 for \$ 1.00

DUNCAN. (Wheeler) 36". Large deep maroon red, early\$ 2.00

EBONY BOY. (Nesmith) 20". If you desire warm rich color for rock garden or front of the border planting, I recommend this variety. A late dark red purple self with a tiny gold cup.\$ 2.00

EDITH RUSSELL. 3 ft. The color is a shade of yellow I have never before seen—not chrome, cream, nor lemon, but exactly the color of sulphur with rose veins, profusely ruffled. The huge open throat is a slightly deeper shade of sulphur. Sepals are the deepest rose sprinkled with gold dust, as though a jeweler had taken powdered gold and done this work. The flower holds up. 4½-in. bloom. (Net).\$ 2.50

EMPEROR JONES. (Hayward) 36". This 6 in. flower of rich mahogany with a golden-throat and mid-rib, is one to be desired.\$ 1.00

ESQUIRE. 34". Red and yellow bi-color, slightly twisted petal and sepal. \$.50

EVANGELINE. (Russell) 32". If you like a twisted daylily you will like this one, the petals are a rosy-red, with a deep purple eye and the sepals are a shade lighter than petals, has quite an orchid appearance.\$ 1.00

FAITH. (Russell) 36". An all over rose with a gold over cast that gives it a glistening that is beautiful, we find that it holds up well in the sun as in the shade and we believe it is Mr. Russell's best in the rose class. It has a habit of blooming spring and fall. \$ 2.00

FANCY TRIMMIN'S. (Russell) Ruffled rosy pink petals and yellow sepals deeply overcast with rose. Deeper rose eye zone. 3½-inch bloom. June, July \$ 2.00

FAR NORTH. (Nesmith) 34". There is a great demand for good large flowered light yellow hemerocallis for most of our gardens needs them to lighten up drab spots in late summer to say nothing of their cool refreshing charm. The heavy substantced flowers are large and full borne to very strong sturdy well branched stalks. Net. \$ 5.00

FESTIVAL. (Stout) 36". A gay bicolor of English-red petals and orange-brown sepals. \$ 1.00

BEARDED IRIS

1953 General List

Cultural for Bearded Iris

RHIZOMES will be shipped to you in a firm container and should be planted as soon as possible after they are received. If you are unable to plant on receiving them, then be sure to keep the rhizomes in a dry and cool place until you can plant them.

"Iris" require good drainage and sun for at least one-half day, in order to obtain the best results, with abundance of bloom. The soil should be moist before planting and kept moderately moist until the plants are well established. Care should be taken not to over-water. If your soil is heavy and poorly drained set the rhizomes a little higher than the surrounding soil. Be sure and spread the roots well and firm the soil around. Separate your plants every third year.

FERTILIZER: BONE MEAL AND SUPERPHOSPHATE are the 2 best types of fertilizer for Bearded Iris. In making a large bed the ratio should be: Superphosphate (20%)—5 to 7 lbs. per 100 sq. ft.

1 cup per plant on single plantings.

Bone Meal—10 lbs. per 100 sq. ft. 1½ cup per single plants.

The above should be repeated in December using only half the amount. Where your ground is worn out you should use Iron Sulphate to stimulate root growth. Copper Sulphate is always good in ground that has had rot or fungi. Very seldom do you need the two latter in virgin soil.

CULTIVATION: Keep your Iris clean at all times by removing the old foliage. Removing the old leaves that pull off with ease, never jerk a leaf that has not turned loose, this may cause injury to your plant and give you trouble later.

Do not cultivate your Iris in the spring month until your blooms stalks have started growth. Too much early cultivation will encourage early growth and your blooms will be frozen. You can keep your Iris clean without working the soil.
